

## Single Digital Gateway (Your Europe):

The Commission launched the Single Digital Gateway, a single point of access to information for Europe's citizens and businesses on rules and procedures that apply when they want to live, study, work, or do business within the EU. The gateway is part of the upgraded Your Europe portal, which provides extensive information about their rights, obligations and administrative procedures and guides them to relevant national websites. To help users from different countries, all information on national websites that are part of the gateway network will now be provided in English, in addition to the national language.

The gateway is the result of two years of successful collaboration between the European Commission and Member States to ensure access to high quality, user-friendly and accurate information from the Your Europe portal. The Your Europe logo, placed on all interlinked pages, is a quality label indicating a trusted information source. In case more information is needed, users will also be led to assistant services such as national contact points or relevant European networks. The content and services provided through the gateway will be continuously updated and upgraded, including by taking into account collected user feedback. By 2023, the single digital gateway will help to ensure that all national procedures are available to cross-border users and provide key procedures online. In addition, it will also facilitate direct exchanges of documents between different Member States' authorities, in order to avoid users needing to submit documents multiple times.
